

USER GUIDE

CONCRETE PRODUCT

LUXURY CONCRETE

Our concrete products are comprised of natural materials only: Granite stone powder/cement/natural jute fiber.

Much like any natural material such as wood or stone, concrete is a porous material. We have sealed the concrete with a wax and an acrylic sealer that will provide active protection and make your concrete furniture last longer.

CARE & MAINTENANCE

To ensure the lasting beauty of the concrete surfaces, we recommend the following care and maintenance instructions:

- Clean with mild soap and water.
- Do not use heavy abrasive, bleach-based, or ammoniated/acid-based cleansers.
- Re-waxing your product regularly – with stone floor wax with a paraffin base.

ONE-OF-A-KIND

Our concrete products are entirely handcrafted by highly skilled artisans.

Natural markings and inconsistencies are inherent to any artisan concrete product . They give the product the unique texture and colour.

It includes:

- Hairline cracks which are not structural and occur naturally in any concrete piece
- Molding folds, which are inherent to the molding process
- Air packet fills, which happen during the molding process and are filled in the finishing as part of the aesthetic look
- Markings and differences in colour to which create the natural look and feel of the finished product
