pile weight: 1760 gr/m²
total weight: 2800 gr/m²
pile height: 6 mm
total height: 6 mm

Care instructions | indoor/outdoor collection

Vacuum with no beater bar/rotating brush.

Spot clean with water, with mild detergent.

The backing may get soft once the rug get wet but this is a normal phenomenon. Air or sundry the rug and backing , it will resume back to normal.

When the rug is cleaned or wet it would be good to move it from the area and turn it upside down to dry the backing and the surface underneath as the water would go through the rug.

When placed on a uncovered wooden patio deck we advise to remove and/or flip the rug during wet weather since it may cause mold or reaction between the latex and wood alkalis.

The rug is water resistant resistant and preferably dry upside down.

To extend longevity of the rug we advise you to store it away during bad weather and winter months.
