Slender artificial plant
Made of a.o. polyester, foam and cement
Suitable for indoor use
H 170 x W 106 x D 63 cm

Does a dark corner in your house need some green? Then this artificial plant is the perfect solution! This artificial plant Rubber comes from the collection of the Dutch brand WOOD. The leaves of the Rubber plant are coloured autumn green and are attached to the artificial branches by hand. The branches and leaves can be carefully bent to shape the plant as desired. The slender trunk stands in a pot which is filled with a hardened combination of foam and cement. The pot has a black finish, the inside is finished in a ribbed look.

The Rubber artificial plant is 170 cm high. The width and depth can be adjusted by a few centimetres, but in its basic form Rubber is 106 cm wide and 63 cm deep. The stem has an average diameter of 5 cm. The pot has a height of 14 cm, the diameter is 17 cm. Rubber weighs 4 kg.

The artificial plant is not suitable for outdoors and not resistant to water and sun. Do not place the Rubber artificial plant in direct sunlight, as this may discolour the artificial plant. To protect the floor, place felt gliders under the pot....
