# SLIDE BARN CABINET ROUGH SAWN PINE SOAP [fsc]

Country of origin

NL

## Additional description

This Slide Barn is anything but a standard storage or bookcase. Barn is a cabinet with possibilities. You can give it your own interpretation. The cabinet has divided over two sides two thick shelves and at the bottom 2 drawers, one side always visible and the other side covered by a sliding door. The sliding door in metal rail can be slid from right to left. The cabinet is made of solid, FSC certified, pinewood and the wood used is roughly sawn.

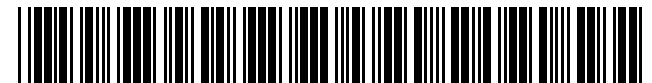

**Rough-sawn wood** This piece of furniture has been made of rough-sawn wood. This means that the wood has been sawn crosswise, which gives it a rustic, sanded appearance. This gives the furniture an aged vintage look. Due to this process, irregularities and small cracks may be more visible. These are characteristics of rough sawn wood. Each piece is therefore unique!

**Note:** the cabinet has a height of 230 cm, because the hardware is slightly above the total height is 232 cm. The cabinet is delivered as a kit with clear assembly instructions....
