Material

Mango wood is known for its warm golden brown colour, sustainable growth and long durability. Mango wood is also characterized by clearly visible grain and colour shades. The grains, a yellow glow or dark lines and knots make every mango wood item unique. Mango wood is very strong and one of the harder woods, therefore a mango wood item will not easily be damaged.

Dimensions

This sturdy side table has a height of 40 cm, a width of 65 cm and is 25 cm deep. The dimension of the long outside is 54 cm, the inside is 46 cm. The size of the short outside is 39 cm, the inside is 30,5 cm. The legs are 4 cm thick and 37 cm high. The table top has a thickness of 4 cm and can carry up to 15 kg when evenly distributed. The side table itself weighs just over 5 kg.

Maintenance

Mango wood furniture is easy to maintain. Simply keep them dust- and stain-free with a slightly damp, clean cloth. Mango wood items are only intended for indoor use. An extra treatment or protection is possible with a transparent coating, but is not considered...
