When cutting the patterns of the hides and skins, factories are left with remnants. These remnants are crushed and we make a new fabric out of this: Recycled leather. Recycled leather consists of 70% genuine leather and 30% polyester. The fabric is made up of two materials: the underlayer consists of recycled genuine leather, which gives it its natural and unique appearance. The leather is protected by a polyester coating which prevents unevenness and makes it a sturdy combination fabric. Maintenance: Recycled leather cannot be treated with grease for leather. Recycled leather can be maintained as follows: a damp cloth can be used to clean the fabric. In case of stains, you can use a neutral soap solution to remove the stains. After removing the stain, wipe the fabric with a damp cloth. This bench is delivered in separate elements. The elements are easy to connect to each other by means of brackets.
