The Lias rug from the Exclusive collection by Dutch brand WOOD is a real mood creator in spacious living spaces. The natural jute rug is contrasting coloured and very generously sized. The edges are finished with a ruffled border, creating a carefree beach atmosphere. Thanks to the use of jute, the rug is very heat-permeable and can easily be placed on heated floors.

Material

Jute is a vegetable material. The grass grows in a tropical environment, the jute fibres are extracted from the pith of the stem. The natural fibres in our collections are very strong and can be coloured very well because of this...
