Additional description

This Slide Barn cabinet is an own production of the Dutch brand VT wonen. The cabinet has two sides, two thick shelves and at the bottom 2 drawers, one side always visible and the other side covered by a sliding door. The sliding door in metal rail can be slid from right to left. The cabinet is made of solid, FSC certified pine with a coarsely sawn finish. The Slide Barn cabinet is available in two colours: concrete grey and matt black, RAL 9004.

Coarsely sawn wood:

This piece of furniture is made of coarsely sawn wood.

This means that the wood is sawn transversely, giving it a rustic sanded appearance. This gives the furniture a vintage look and feel. This treatment can make unevenness and small cracks extra visible. These are characteristics of coarsely sawn wood. Each copy is therefore unique!

Note: the cabinet has a height of 230 cm, the total height is 232 cm because the hardware is slightly above it. The cabinet is supplied as a kit with a clear assembly instruction.
