## Additional description

The June wall rack, (hwxwd) 195x120x35 cm, comes from the collection of the Dutch brand WOOD. This metal wall rack is made of a cold rolled tubular steel frame 15x15x1 mm, combined with eight cold rolled steel shelves (0.7 cm thick). Each shelf has a maximum weight of 15 kg. June has a total maximum weight of 120 kg. The height between the compartments is 41.5 cm and the height of the two smaller compartments is 19.5 cm. The width of the large compartments is 75 cm. The width of the narrow compartments is 40 cm. The whole is finished with a black powder coating. June is also available with a width of 85 cm. June has a total weight of 27.5 kg.

Please note: as a room divider, one narrow side must always be placed against a wall in order to be able to fix this rack securely. It is not recommended to place the rack in a freestanding position, as this may cause the rack to fall over.
