

Thank you for buying 'Box shelf 550 Slimline'

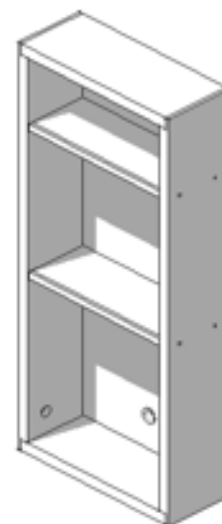

Instructions.

Please read the instructions and warnings carefully before use to ensure safe and satisfactory operation of this product.

The Box shelf is supplied with screws and wall plugs suitable for a stone or brick wall. For other wall types (eg. hollow plasterboard) alternative fixings will be required. If in doubt, consult a qualified professional.

You will need a power drill, a masonry drill bit, a medium cross-head screwdriver, a spirit level, a ruler / tape measure and pencil to install this product.

Ensure the wall surface is flat and of suitable strength and construction before securing the Box shelf.

Fitted cabinet view.

Fixings:

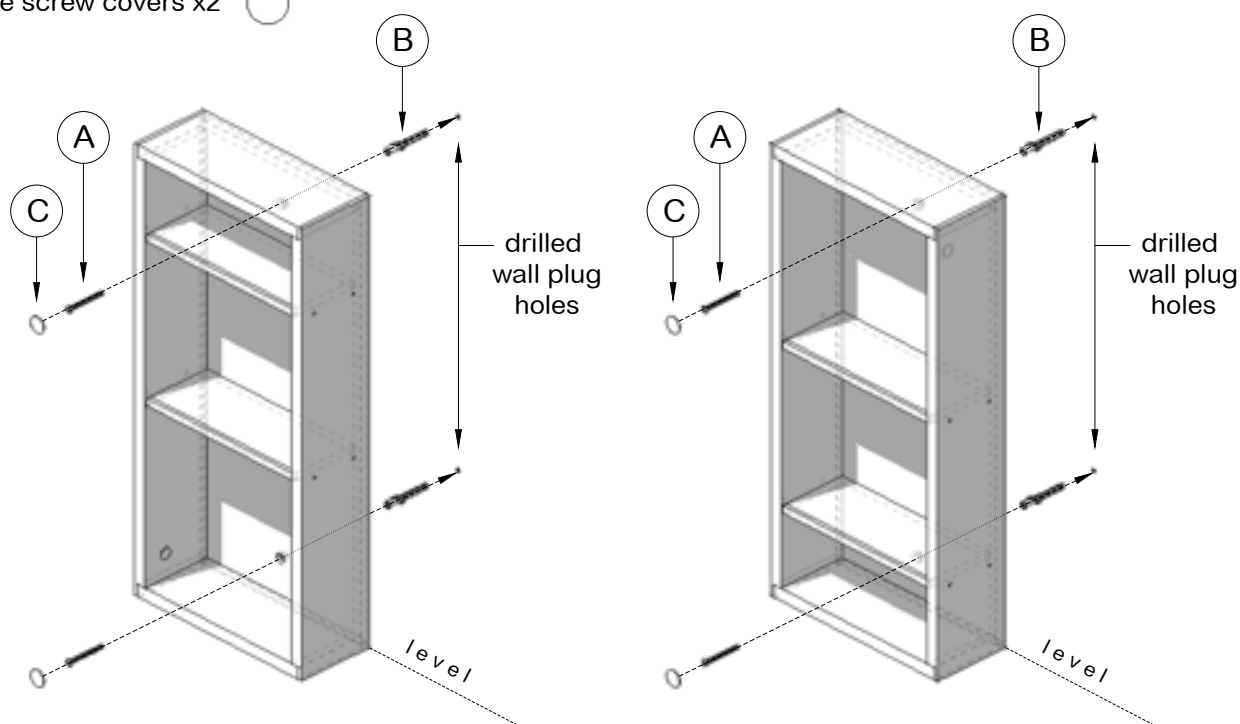

(A) - Wall screws x2

(B) - Wall plugs x2

(C) - Adhesive screw covers x2

Either way installation

Fitting instructions:

Position the shelf against wall using spirit level to check alignment. Using a pencil mark the positions for the two wall plug holes from inside the cabinet. Drill holes to appropriate depth and push in wall plugs (B) so they are flush. Hold cabinet up to wall and fix screws (A) securely from inside the cabinet to the wall plugs (B). Stick adhesive screw covers (C) (matching grain direction)

Warnings:

Fit in accordance with manufacturers instructions. Wear suitable eye protection when drilling. When using power tools near water the use of a residual current device is advised for added protection against electric shock. Beware of hidden pipes or power cables in the wall. Take care when drilling on glazed tile surfaces in case the drill slips. Avoid contact with water and liquids as this may cause damage to surface finishes. Maximum load - 2kg per shelf.

Cleaning:

Wipe using a damp cloth with mild soap solution; do not use abrasive cleaners as these may damage the surface finish.
