Fauteuil PPno.2

552-020-series

“ Thank you for choosing a pols potten product.
To ensure safe and satisfactory use of this product,
please carefully read the below instructions beforehand. ”

general information

The frame of this furniture is made of laminated wood. The wood that is used is carefully dried to prevent cracks. The foams used inside are polyether and high resilient quality foams each carefully chosen for optimum seating comfort. The furniture is upholstered with a fire retardant, UK BS5852 FR source 0, cigarette proof, 100% polyester velvet with 100.000 martindale.

care instructions

Daily use of fabric. Proper care extends the life of your furniture. Here are a few tips:

- Avoid direct sunlight as the colour of the fabric may be adversely affected.
- Furniture fabrics are easily damaged by sharp pant buckles and buttons, pet's claws, toys and rings etc. which can permanently damage the weave. Beware that dark painted jeans may also stain your furniture!
- Furniture with loose back, seat or arm cushions must be regularly fluffed up or shaken. If this is not done properly, the cushions will lose their shape and volume and there will be more creases in the fabric or leather.

Liquid stains: most important tips for the treatment of liquid stains.

- Liquid spills must be treated immediately. Gently rub with wide, gentle strokes with a light colored cotton cloth. Do not scrub or dab stains. This causes irreparable damage to the weave.
- Do not use just any household solution of gall soap, detergent or green soap. These substances are strongly alkaline and sticky, which means that the fabric will quickly become dirty again. It is also difficult to completely rinse all traces of soap from the furniture fabric.
- Test any cleaning agent on a hidden piece of fabric before applying it to a stain.
- Seek professional advice if you don't know how to treat a stain. Cleaning treatments may worsen the original stain.

Moist food spills: most important tips for the treatment of stains due to food spills.

- Moist food spills must be treated immediately. Remove as much of the spilled food with a spoon, working from the outside inwards.
- Moisten a preferably light colored cotton cloth or hand towel with cold water, wring out any excess water and place it on the stain. Repeat after 6 hours until the stain is completely absorbed. Do not repeatedly lift the cloth during this process, this interrupts the absorption process. Do not use kitchen paper towel for the above treatment; its absorbancy is weaker and the paper may contain ink that will cause another type of stain.
- After cleaning the fabric allow the treated area to dry out completely before using the furniture again.
- Consult www.james.eu for additional stain treatments or seek professional advice.

safety note

- Always completely lift the furniture when moving it. Handle and move it with care as improper handling may cause damage or injury.
- Heavy/larger furniture pieces should be moved by two persons.
- Ensure the furniture is always placed level on its four legs.
- Do not stand, climb or jump on the furniture.
- Please keep these instructions for future reference.

components & parts

Tools are not included.

assembly instructions

Use a wrench (size nr. 13)
