

KENJI

CABINET

DESCRIPTION

With a robust furniture item like the Dutchbone Kenji, you can instantly add more character to your interior. This cabinet has a striking oval shape and is made entirely of black wood. The wide, round legs lift the furniture just slightly off the ground and show off its rounded shapes even better. But what makes this cabinet or sideboard truly unique is the finish with narrow vertical slats. Thanks to this, the doors are barely visible, creating a cohesive whole. In short, a true statement piece to take your interior to the next level.
